

PROFESSIONAL SUMMARY

Final-year B.Tech Computer Science & Design student (GPA: 9.6) with 6 months of hands-on full-stack internship experience at Labmentix, Pune. Proficient in building scalable, secure, and enterprise-grade web applications using React.js, Next.js, Node.js, Express.js, PostgreSQL, MongoDB, and Supabase. Experienced in designing RESTful APIs, implementing JWT/OAuth-based authentication, and delivering complex workflow-driven systems. Passionate about clean architecture, modular code, and performance optimization. Actively seeking a Full Stack Developer role to contribute to data-driven enterprise solutions.

EDUCATION

Degree	Institute	Board / University	CGPA / %	Year
B.Tech – CS&D	Dr. D.Y. Patil School of Science & Technology, Pune	Dr. D.Y. Patil Vidyapeeth	9.6 (Current)	2022 – 2026
Senior Secondary (XII)	Creane Memorial High School	CBSE	75%	2022
Matriculation (X)	Creane Memorial High School	CBSE	92%	2020

WORK EXPERIENCE

- Web Developer Intern

2024 – Present (6 months)

Labmentix

Pune, India

Engineered and maintained full-stack web features using React.js, Node.js, and Supabase, contributing to scalable enterprise-grade application delivery in an Agile team environment.

Designed and integrated a robust audio pipeline – including upload, in-browser recording, and speech-to-text conversion – leveraging the DeepSeek model via the Replicate API, improving content accessibility for end-users.

Architected efficient data storage and retrieval strategies across MongoDB and Supabase, ensuring data integrity, optimized query performance, and clean API design aligned with RESTful best practices.

Collaborated closely with cross-functional teams including design, QA, and product management to deliver end-to-end web applications on schedule.

PROJECTS

- Empath – Emotionally Intelligent AI Companion

2026 – Present

React.js, Node.js, Express.js, MongoDB, Claude AI API, JWT, Tailwind CSS, Framer Motion

GitHub

Architected a full-stack, multi-turn AI chatbot application with a custom empathy-focused system prompt using the Claude AI API, delivering therapeutic dialogue for users experiencing emotional distress.

Implemented secure JWT-based session authentication and a persistent conversational memory system using MongoDB, enabling context-aware, human-like interactions across sessions.

Built mood tracking and journaling modules with structured data persistence, generating reflection prompts and emotional trend analytics for user self-awareness.

Engineered sentiment-aware response routing logic that dynamically adapts AI tone (grounding, validating, or challenging) based on detected emotional state, alongside crisis-detection logic that surfaces mental health resources on distress signals.

Crafted a fully responsive, accessible UI with Framer Motion micro-animations optimized for mobile and desktop, achieving a calm, distraction-free user experience.
- GuardianGo – Full-Stack Ride Sharing Platform

Jan 2025 – 2026

Next.js, Tailwind CSS, Supabase, Clerk (OAuth), Stripe, Google Maps API, PostgreSQL

GitHub

Developed a production-grade, full-stack ride-sharing application featuring real-time driver tracking, ride booking, ETA estimation, and Stripe-powered payment processing.

Integrated Clerk for OAuth-based secure authentication and implemented role-based access control (RBAC) for drivers and passengers using Supabase’s Row Level Security (RLS).

Designed normalized PostgreSQL database schemas for ride history, user profiles, and transactions, ensuring data integrity and high query performance at scale.

Implemented Google Maps API for live geolocation, dynamic route rendering, and real-time ETA calculation, delivering a seamless and reliable user experience.
- Guptify – Secure Cloud Storage Application

Jan 2025

Node.js, Express.js, TypeScript, React.js, Supabase, JWT, Multer

GitHub

Built a secure, enterprise-style cloud storage platform with file upload/download (via Multer), folder management, advanced search filters, and permission-based file sharing.

Implemented JWT-based authentication and fine-grained authorization mechanisms; deployed backend on Render with optimized API response times and modular, maintainable code architecture.

• **Chinah India – Real-Time Sign Language Recognition**

Jan 2024 – Present

Python, OpenCV, MediaPipe, Machine Learning (scikit-learn)

GitHub

- Developed a real-time sign language recognition system that converts hand gestures to text using MediaPipe landmark detection and a trained ML classifier, achieving smooth live performance.
- Optimized detection pipeline for low-latency inference and built a clean, accessible UI to improve usability for the hearing-impaired community.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), Python, Java, C, TypeScript
- **Frontend:** React.js, Next.js, Tailwind CSS, HTML5, CSS3, Framer Motion, Responsive Design
- **Backend:** Node.js, Express.js, RESTful API Design, Middleware Architecture
- **Databases:** MongoDB, PostgreSQL, Supabase (with RLS), Database Schema Design, SQL
- **Authentication & Security:** JWT, OAuth 2.0, Clerk, Role-Based Access Control (RBAC), Application Security
- **Tools & Platforms:** Git, GitHub, Postman, VS Code, Figma, Multer, Stripe, Chart.js, Render, Vercel
- **Concepts:** Software Architecture & Design Patterns, API Integration, Agile Development, DSA (Python), Deployment, Debugging & Performance Optimization

KEY COURSES & CERTIFICATIONS

- **Computer Science:** Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Software Engineering, Web Development (Full Stack)
- **Certifications:** Full Stack Web Development – (Course Completed); actively expanding expertise in PostgreSQL, system design, and enterprise application architecture

ACHIEVEMENTS & HIGHLIGHTS

- **Academic Excellence,**Maintaining a GPA of 9.6 / 10 in B.Tech Computer Science & Design at Dr. D.Y. Patil School of Science
- **Full-Stack Internship,**Successfully completed 6-month internship at Labmentix, Pune – delivering production-grade full-stack fe
- **Open Source & Personal Projects,**Built and deployed 4+ full-stack applications independently, demonstrating end-to-end own
