

DEVRAJ SAMADHAN SHINDE

Software Engineer | Android, Web & Full-Stack App Developer

shindedevaraj0@gmail.com | +91 70304 35112 | Chennai, India

GitHub: github.com/Devraj-prog6914 | LinkedIn: linkedin.com/in/devraj-shinde-897043324

SUMMARY

Software Engineering student who builds apps and websites. Skilled in Java, Kotlin, Python, and JavaScript. Experienced in Android apps, web platforms, and AI tools. Built REST APIs and authentication systems. Used Firebase, MongoDB, and Node.js. Interned in Android development at Corizo. Also interned in digital marketing at Internshala. Won 1st Prize at an international hackathon. Ranked Top 50 nationally at Smart India Hackathon 2025. Seeking a Software Development Engineer internship.

SKILLS

- **Languages:** Java, Kotlin, JavaScript, Python, SQL
- **Web & Mobile:** HTML, CSS, Tailwind CSS, Next.js, Android (Kotlin), Jetpack Compose, Flutter
- **Backend & Databases:** Node.js, Express.js, REST APIs, MongoDB, Firebase, JWT
- **Tools & Concepts:** Git, GitHub, Android Studio, Data Structures & Algorithms, OOP, AI/ML Integration
- **Soft Skills:** Problem-Solving, Communication, Adaptability

EDUCATION

B.Tech, Computer Science & Business Systems (CSBS) — SRM Institute of Science & Technology, Chennai

2024 – 2028 (Ongoing)

Class XII (MSBSHSE), Disha Public School & Jr. College, Wai, Maharashtra — 2024

Class X (MSBSHSE), St. Paul's School & Jr. College, Satara, Maharashtra — 2022

EXPERIENCE

Android App Development Intern | Corizo

Aug 2025 (2

Months)

- Built an Android app using Kotlin and Jetpack Compose.
- Structured the app with MVVM architecture for maintainability.

Social Media Marketing Intern | Internshala

Jan 2025 –

Feb 2025

- Ran social media campaigns to promote paid online courses.
- Improved audience targeting through data-driven testing.

PROJECTS

AI Recruiter Pro — AI-Powered Recruitment Platform — Next.js, TypeScript, Node.js, Express, MongoDB, JWT, OpenAI Embeddings

- Built a full-stack recruitment platform using Next.js, Node.js, and MongoDB.
- Used OpenAI embeddings to match candidates to job descriptions.
- Added resume parsing and JWT-based authentication.

AI-Powered Climate Risk Reporting App — Kotlin, Jetpack Compose, Firebase, AI/ML, Google Maps API

- Built a real-time hazard reporting app in Kotlin and Jetpack Compose.
- Used AI to validate images and prioritize incidents by location.
- Won 1st Prize at CODEFEST '26 International Hackathon.

MediPlus — AI Healthcare Accessibility App — Kotlin, OCR, Firebase, REST APIs

- Built an AI-powered prescription scanner using OCR.
- Suggested generic medicine alternatives and nearby pharmacies via a REST API.

ACHIEVEMENTS

- 1st Prize — CODEFEST '26 International Hackathon (Feb 2026), for the AI-powered climate risk reporting app
- Special Award — CODE-A-THON '26 National 36-Hour Hackathon (Jan 2026)
- 2nd Prize — Code4Change '26 National 24-Hour Hackathon (Feb 2026)
- Top 50 Teams (National) — Smart India Hackathon 2025 (Dec 2025)
- 2nd Prize — TIFAC Hackathon, VIT Vellore (Apr 2025)

CERTIFICATIONS

- Android App Development — Corizo (2025)
